

Fr. Andrzej **Pieńkowski**, Archival Resources of the Parish Archive in Rydzewo Near Rajgród (XIX-XX Centuries)

Summary

The article aims at presenting the resources of the Archive in the Parish of St. Adalbertus in Rydzewo near Rajgród which is dated from 1810 to 2000. The author studies acts among which there are many not obligatory today. Therefore the structure of the article does not follow the present order of parish archives. The important fact is that the Rydzewo Parish acts base mainly on registers dated in XIX century. Since they also contain municipal acts, account, and correspondence, the simple division of the documents is often not possible. The article also mentions the archival material which was annexed by the state archives in the past.
